Integrated vents give you the ability to add extra airflow on hot summer days or defrost your windshield on the coldest winter mornings

Offers fully-sealed or flipped-down venting options. Upper half detaches, leaving lower half for protection with maximum ventilation.

REAR PANELS

Turbulent air forms above the cargo bed and behind the cab when you add a windshield. This swirl can carry dirt, dust, leaves and rain into the cab. Eliminate this phenomenon and control the swirl by installing a rear panel.

TIRE SEALANT

24 X 7 COVERAGE | BE PREPARED FOR ANYTHING

HOW IT WORKS

- 1 Tire sealant remains liquefied inside the tire until a leak develops in the tire or wheel.
- 2 Once a leak occurs, the tire sealant rushes out of the tire and quickly creates a permanent solid plug, maintaining tire pressure so you can continue your ride.

HOW MUCH DO YOU NEED?

$$\text{TIRE HEIGHT (IN.)} \times \text{TIRE WIDTH (IN.)} / 5 = \text{LITERS REQUIRED PER TIRE}$$

PREMIUM TIRE SEALANT

- Instantly seals and repairs rim, bead leaks and punctures up to 0.64 cm on standard tires and 1.9 cm on heavy ply tires
- Helps seal the tire bead against the wheel
- Creates permanent repair, helps maintain air pressure for the life of the tire
- 100% water soluble for easy cleanup
- Remains fluid and effective in temperatures down to -43° C
- Will not rust, corrode or pit wheels
- Easily installed through existing tire valve stem with valve core removed

OIL & LUBRICANTS

Our PS-4 engine oils provide ultimate performance and protection, they're formulated with exclusive additives to keep engines clean from deposit buildup. These powersports-grade full synthetic oils helps maximize power and protect your engine for the long term.

PS-4 FORMULATIONS BEST PROTECTION, BEST PERFORMANCE

PS-4 5W-50 FULL-SYNTHETIC OIL

Optimal for ambient operating temperatures of -40° C to 38° C.

.95 L 2876244	3.8 L 2876245	60.6 L 2876247	208 L Drum 2876246	1249 L Tote 2878814
------------------	------------------	-------------------	-----------------------	------------------------

PS-4 0W-50 EXTREME FULL-SYNTHETIC OIL

Optimal for ambient operating temperatures of -43° C to 54° C.

.95 L 2889395	3.8 L 2889396	60.6 L 2889397	208 L Drum 2889398	1,249 L Tote 2889399
------------------	------------------	-------------------	-----------------------	-------------------------

PS-4 EXTREME SYNTHETIC 0W-50

- Our best extreme high and low temp formula, excellent for high temperatures and racing, even at temps of 54°C, plus easier cold starting even below -42°C
- Expect the best in wear protection thanks to premium PAO and ester base stocks combined with a balance of moly and ZDDP additives
- Polaris exclusive clean engine additive system reduces deposits and carbon build-up for peak performance and power

THE BEST PROTECTION, MAXIMUM PERFORMANCE

- Powersports grade full synthetics provide long lasting engine protection
- At least 40% improved wear protection compared to all aftermarket oils tested (see engine wear test chart)
- Polaris exclusive clean additive system
- At least 50% less deposits than all aftermarket oils tested (see deposit test chart)
- Cleaner engine with less deposits means consistent maximum power and performance

WIDEST VISCOSITY FOR ULTIMATE PROTECTION

ENGINE WEAR TEST

LOWER NUMBER = LESS ENGINE COMPONENT WEAR
LESS WEAR ON PARTS MEANS LONGER ENGINE LIFE

ASTM D4172. In 3rd party testing against 9 competitive products Polaris had 40% or better wear protection compared to all of the tested products. Numbers represent mm of wear scarring measured. Test measures wear at contact points, wear scar is measured for its length and width (in units of mm). Lower wear numbers mean better wear protection and friction reduction.

DEPOSIT TEST

LOWER DEPOSITS = MAXIMUM POWER

ASTM D6335. In 3rd party testing against 9 competitive products Polaris PS-4 had less than half the deposits compared to the next closest product. No other tested products met Polaris Engineering standards for deposit cleanliness. Test measures mass of deposits in mg in high temp, high stress test cycles. Higher deposits will impact engine power and performance.
